

TREND STAR

Product line: Silverline

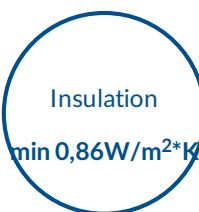

We were invented for traditional clients. We are classical beautiful, so we look good in every interior. Our functions are reliable - we save energy and protect from the noise.

PRODUCT INFORMATION

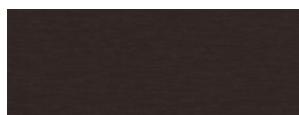

PRODUCT DESCRIPTION

Trend Star is:

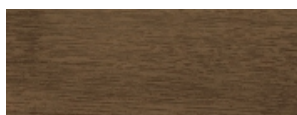

- A 5-chamber profile with the building depth of to 70 mm, which makes it possible to earn very good warmth parameters
- External profile walls with the thickness of 3 mm, which fulfill the highest RAL standards - "Class A" (PN-EN 12608)
- A layout of two tightening gaskets, which provides an excellent tightness and thermal and acoustic insulation
- A profile with a classical optic and balanced proportions, which makes it possible to fit windows with every elevation type
- A low total height of the frame and wing (118mm), which provides an excellent interior elucidation;
- The possibility of using glazings from 8 to 42 mm without using any additional profiles
- Reinforcements made of steel, used on the whole construction circuit, which provide an excellent static stability and long-term functionality
- Smooth and easy in caring surfaces, which don't need conservation
- A 13- mm fitting notch axis is a better protection from the burglary
- The glazing is deposited at the depth of 24 mm, what reduces the liquefaction of water vapor in the glazing and makes it difficult to force the window

SPECIFICATIONS

BUILDING DEPTH

70mm

THERMAL INSULATION

In connection with a standard glazing
4/16/4 $U_g = 1,1$ W/m²K the $U_w = 1,2$
W/m²K. With the 4/14/4/14/4 $U_g = 0,6$
W/m²K the U_w factor 0,86 W/m²K

GASKETS

Modern EPDM gaskets with a shape
memory, available in: black, gray or
optionally caramel

ACOUSTIC

Max 48dB

ANTI-BURGLARY

In the standard, they're equipped with 1 anti-burglary catch. It's possible to execute the Trend Star windows in the safety class up to RC2

NUMBER OF CHAMBERS

5

FITTING

The modern Maco Multi fitting, equipped with anti-brake in plugs i.S (intelligent Safety)

GLASS

The Trend Star windows are in the standard equipped with a compound glazing 4/16/4 $U_g=1,1 \text{ Wm}^2/\text{K}$. But it is possible to make windows with glazing 4/12/4/12/4 or 4/14/4/14/4 with factors $U_g=0,7$ or $U_g=0,6 \text{ Wm}^2/\text{K}$
