

CLIMASTAR 82 ALUPLUS

Product line: Platinumline

We connect the advantages of a PVC and an aluminum window uniquely, we willingly appear in the modern architecture and protect our inmates from burglary, losing warmth and noise. We are windows from the top shelf.

PRODUCT INFORMATION

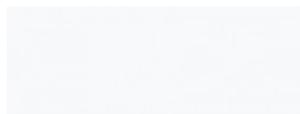

PRODUCT DESCRIPTION

ClimaStar 82 AluPlus is:

- an organic and economical symbiosis of two materials, which connects the thermal insulation of PVC windows in the ClimaStar82 system with the robustness of the aluminum windows;
- Using every advantage of the modern PVC windows: the excellent thermal insulation, tightness, easy maintenance and safety parameters
- An unlimited colour diversity
- the possibility to produce windows in every colour of the RAL palette, anodic aluminum or wooden-like colours;
- The possibility of an optical fitting of the PVC window to the aluminum facade;
- Optics on the highest level but also an excellent protection of noise and burglary;
- The ClimaStar 82 AluPlus windows excellently fit every architecture style and fulfill the highest expectations of the conventional and modern architecture.
